I Software Installation

1 Introduction

Zviewer for Android is a mobile app used to stream live video from your ZMODO H.264 DVR or IP Network camera, and supports a four channel simultaneous view. This guide focuses on the installation and use of the application.

2 Requirements

- ***Hardware**: Android™ System Mobile Phone
- ***System**: Android™ 2.2 and above version
- ***Network**: WIFI or GPRS

3 Installation Steps

From your Android device: Access Google Play, and download Zviewer.

From a computer: Go to <https://play.google.com/store>, and download Zviewer. Connect your phone to the computer, copy the contents of this file to your phone's SD card, and install as prompted.

II Operation instruction

1 Opening Program

Locate the Zviewer application and tap to launch. Once the application loads, you will see the main interface.

Table II-1 Start

2 Managing Device

- 1) From the main interface, tap the SETTING button on the bottom of the toolbar, and enter the Device List interface;
- 2) If there are no devices added, you will be prompted with "No device, please add" (See No Device);

- 3) Tap the ADD NEW DEVICE button at the bottom to enter the device information;
- 4) Enter a name for the DVR, its IP address, port number, username, password, and number of channels, then tap OK to save your changes (See Device Add);
- 5) To delete or alter a device long-press on the desired device (See Device Edit);
- 6) To return to the main page without making any changes, tap CANCEL.

3 Playing Video

- 1) With the application open, tap on any channel's play window; an orange border will surround the chosen channel;

- 2) Tap the START button at the bottom of the toolbar to play the video (See Play); if you see a popup prompt stating “please connect to devices”, make sure you have followed all instructions listed in section 2.2;
- 3) To stop streaming, tap the STOP button at the bottom of the toolbar.

Tablell-5 Play

4 Remote Controller

- 1) With the application open, tap the SETTING button on the bottom toolbar to enter the device list (See Device List), or long-press the channel you would like to change;
- 2) Tap on the desired DVR to open a popup channel list (See Channel List);
- 3) Tap on the desired channel from the popup channel list; the program will automatically switch back to main interface, and play this channel's video.

Tablell-7 Channel List

5 Switching Channels

- 1) With the desired screen selected with the orange outline, tap CH at the bottom of the toolbar to reveal the channel selection buttons (See Channel);
- 2) Select the channel you would like to display; swiping your finger across the bar will reveal alternate channels;
- 3) Tap the RETURN button to go back to the original toolbar.

TableII-8 **Channel**

6 Switching Display Modes

- 1) Double tap the video window to switch between single channel and four channel views;
- 2) Switch between Portrait and Landscape views by turning your phone horizontally or vertically (See Portrait, Landscape). When viewing in Landscape mode, all functional buttons will be hidden.
