## Smart Temperature Control

The Smart Learning Thermostat that adjusts your temperature and saves you money.

### The longer you use it, the better it gets

Practice makes perfect, and in the same way, your thermostat will learn and adapt to you over time. After time, you won't have to change your temperature anymore, your thermostat will set your temperature exactly the way you want it, when you want it.

### Saves money

The Smart Thermostat automatically adjusts your heating and cooling to save you money when you're not home. It accounts for the optimal way to heat and cool your home to save energy.

#### Compatibility

Compatible with major air conditioners and heating units in North America.

#### Current weather

The Smart Thermostat displays the weather forecast on the screen and can automatically adjust itself accordingly.

#### Maintenance notifications

If your AC or heating unit needs maintenance, the Thermostat will display the problem on screen.

#### Eco mode

The Thermostat can be set to Eco mode to automatically save you money by accounting for peak demand times and optimal temperature.

Smart Vents that automatically open or close to regulate temperature in every room.

### Even out your AC and heating

Ever have the problem of one room being colder or warmer than others in your home? Zmodo Smart Vents automatically adjust airflow to stop that issue once and for all and keep your rooms the temperature you like.

### No complicated wiring to install

The Smart Vents have built-in rechargeable batteries, so you don't have to worry about any wiring hassle during installation.

#### Local and remote access

Set room temperature through the display panel or remotely via the App.

#### Built-in rechargeable battery

Receive a notification in the app when your battery is low, and use the charging pad to quickly recharge your vent without removing it.

#### Built-in air quality sensor

Get readings of the state of your ventilation system and receive alerts to clean it to protect your family's health.

#### Built-in PIR motion detection

Can automatically detect if someone's in the room, and adjust airflow accordingly.
